SUMMARY

Full Stack Developer with 5+ years of experience building scalable, high-performance web applications using React, Next.js, Node.js, NestJS, and PostgreSQL. Experienced in API integration, performance optimization, caching, cloud deployments, team leadership, and exploring GenAI solutions and AI-powered product experiences.

SKILLS

Languages:	JavaScript, TypeScript, Python, HTML, CSS
Frontend:	React.js, Next.js, Redux, React Query, TailwindCSS, MUI
Backend:	Node.js, Express.js, NestJS, REST APIs, GraphQL
Databases:	PostgreSQL, MongoDB, MySQL, Oracle, Prisma, Sequelize
Search:	MongoDB Atlas Search, Typesense, Elasticsearch
Architecture:	Microservices, SSR, Caching, Background Jobs, API Design
Cloud & DevOps:	AWS (EC2, S3, RDS, Amplify, Lambda, API Gateway), Nginx
Messaging & Caching:	Redis, BullMQ, RabbitMQ, Socket.IO
Payments:	Razorpay, Stripe
GenAI:	LLM APIs, Prompt Engineering, AI-powered workflows, RAG
Tools:	Git, GitHub, GitLab, ESLint, Prettier, Responsive Design

WORK EXPERIENCE

GearX.AI

Bengaluru, Karnataka

Full Stack Developer

June 2026 – Present

- Building and optimizing a scalable musical-instruments e-commerce marketplace using Next.js, React, Node.js, Express.js, GraphQL, and MongoDB.
- Developed fast product discovery using MongoDB Atlas Search, including search, filtering, product retrieval, and optimized data-fetching workflows.
- Designed configurable product bundle and curated-kit workflows supporting required/optional products, discounts, partial selections, cart, and checkout integration.
- Improved application performance through code splitting, lazy loading, image optimization, caching, React Query optimization, and Core Web Vitals analysis.

Cilans System

Ahmedabad, Gujarat

Full Stack Developer

June 2024 – June 2026

- Built scalable web applications using React, Next.js, NestJS, PostgreSQL, Redis, and BullMQ, improving initial page load time by ~38% through SSR, caching, and query optimization.
- Reduced initial JavaScript bundle size by ~25% through dynamic code splitting and lazy-loading strategies, improving frontend performance and LCP.
- Led development activities including requirements, code reviews, weekly demos, team coordination, and production delivery across a team of 5+ developers.

Tecmantras Solutions

Ahmedabad, Gujarat

Frontend Developer

July 2023 – March 2024

- Refactored complex React applications into modular and reusable component architecture, reducing frontend code complexity by ~22%.
- Optimized data fetching using React Query, caching, SSR, and prefetching, reducing redundant API requests by ~35%.
- Led a team of 4 developers through sprint planning, code reviews, pair programming, and technical mentoring, reducing PR review cycles by ~40%.

CIMET Pvt. Ltd

Jaipur, Rajasthan

Frontend Developer

Feb 2022 – June 2023

- Built 20+ reusable React components and custom hooks, improving development speed and reducing duplicate code across multiple products.
- Reduced redundant API requests by ~18% through caching, memoization, debouncing, and optimized data-fetching patterns.
- Conducted code reviews and established frontend coding standards, contributing to an estimated ~25% reduction in production bugs.

Newton School

Full Stack Web Development Intern

July 2021 – Feb 2022

- Developed full-stack web applications and collaborated on real-world projects under production-like deadlines.
- Participated in hackathons and rapid prototyping activities focused on solving real-world technical challenges.

EDUCATION

M.L.V. Textile & Engineering College

B.Tech in Information Technology

Bhilwara, Rajasthan

July 2016 – Sept 2020
